Trust...holds a relationship forever

quality  
commitment

Customer satisfaction is Oum group's highest priority. We achieve this goal by continuously improving the cost effectiveness and performance of all of our products and processes, as well as focusing on innovation.

**trustlam™**  
Premium Laminates  
Trust...holds a relationship forever

## THE GROUP PORTRAY

Since its inception in 2004, at New Delhi, INDIA We at Oum Lamitech (P) Ltd. synonym for decorative laminates. Our ultra modern plant manufactures, supply, and exports an impeccable assortment of Laminate Sheet demanded by the domestic as well overseas market.

We dedicate ourselves to sourcing the trendiest designs and, provide high quality laminated surfaces to the architectural, interior design and furniture sectors. Our collection of laminates creatively satisfies aesthetics, durability and functionality for any type of space, theme, idea and application.

With a designer-focused mindset, Trustlam's designs are curated to meet ever-changing market desires and requirements. Our durable products are environmentally friendly and resistant to stain and scratches. These products are widely appreciated in the market for high strength, stylish appearance, accurate dimension and perfect finish.

Customers, be it commercial or residential, will discover that Trustlam's laminate designs enable you to forge lasting impressions anywhere.

WE EMBRACE ADVANCED  
MANUFACTURING STANDARDS  
AND CONTINUES RESEARCH

150  
skilled  
workers

480  
designer  
decor range

65k  
hpl sheets  
every month

Through the implementation of these procedures and standards, we work in a systematic way and integrate quality processes and behaviours into our team's objectives and daily operations to demonstrate our commitment and determination to be a quality focussed sustainable enterprise.

## Technical Specifications - TrustLam

Properties	Specified Values <small>AS Per IS:2046-1995</small>	Verified
Thickness	1.00 MM (±10%)	✓
Resistance to surface wear	350 (Revolution)	✓
<b>Resistance to immersion in boiling water</b>		✓
- Mass increase (%)	10.0 (Maximum)	✓
- Thickness increase (%)	11.8 (Maximum)	✓
Resistance to dry heat 180°c	Not Worse then 4	✓
<b>Dimensional stability at deviated temperature</b>		✓
- Longitudinal (%)	0.550 (Maximum)	✓
- Transverse (%)	1.025 (Maximum)	✓
<b>Dimensional stability at 20°c</b>		✓
- Longitudinal (%)	0.375 (Maximum)	✓
- Transverse (%)	0.600 (Maximum)	✓
Resistance to impact by small diameter ball	20N Minimum	✓
Resistance to cracking	Not worse then 4	✓
Resistance to scratching	2N Minimum	✓
Resistance to staining	Not worse then 5	✓
<b>Resistance to color change (wool standards)</b>		✓
- In xenon are light	Not worse then 6	✓
- In enclosed carbon arc light	Not worse then 5	✓
Resistance to cigarette	Not worse then 3	✓
Resistance to steam	Not worse then 4	✓
Appearance	free from foreign particles	✓

**DO NOT USE CHEMICALS FOR CLEANING.**

---

**AVOID DIRECT SUNLIGHT OR CONTINUOUS LIGHT THAT MAY CAUSE TO COLOR FADING.**

---

**EXTRA CARE REQUIRED IN VERTICAL PASTING OF SHEET AS THERE IS POSSIBILITY OF BUBBLES DUE TO LACK OF UNIFORM PRESSURE.**

---

**CRACKING AT CORNERS & AROUND CUTS MAYBE CAUSED BY IMPROPER CONDITIONING. IMPROPER BONDING, POOR PLANNING AVOID ALL THESE TO PREVENT CRACKING AT CORNERS.**

---

**LIMITED PRODUCT WARRANTY**

Kindly check the sheet in all aspects immediately after purchasing and prior to cutting.

In case of manufacturing defect, only replacement of unused sheet will be made. No further claim will be entertained thereafter.

No warranty for corner crack or air bubble.

## Laying Instructions

- ☞ Before use ensures that the surface or plywood and laminates is **Clean, Dry, Leveled and free of Oil**. Excess moisture or other contaminants, such as dust, synthetic particles, etc.
- ☞ Only use white PVA Adhesive to stick the sheet. Apply **Double Layer of Adhesive on Edge (Minimum 3-4 Inch)** of Both The Surfaces.
- ☞ The adhesive should always be stirred before use. **Sufficient adhesive should be applied on both of the surface to be bonded.** Don't add water into the adhesive, it makes the bonding weak.
- ☞ Once adhesive applied is trickily in nature (Usually requires **5-10 minutes, depending on atmospheric conditions**), the laminate should be placed on the surface, accurately aligned.
- ☞ Sufficient bonding procedure to ensure intimate contact **necessary for an adequate bond** should be applied over the entire area using as much as procedure as possible as possible without damaging the assembly.
- ☞ Pinch rollers (Rotary Press) and heavy weighted rollers are ideal; **Hand rolling should be done from the center to the edges** to ensure the removal of air bubbles. The edges should be rolled twice. For Satisfactory bonding, the area in question should be kept under **pressure for a period of 12-18 hours** (Depending on atmospheric conditions).
- ☞ In rainy season or when humidity is too high, moisture may condense on the surface during drying (Know as "Blushing") and will prevent an acceptable. Hot Spray or Forced air drying may be used to help prevent this condition.
- ☞ It is recommended that the maximum sheet size used for vertical field application be limited to **610x2440 mm (2x8 Ft.)**.
- ☞ When laminate is pasted vertically, Maintain uniform pressure on all sides till adhesive is dried.
- ☞ To avoid stress cracking, avoid making cut out having sharp corners and rough edges.
- ☞ A gap of minimum 2 mm should be maintained between two laminates while pasting side by side.
- ☞ Due to transportation limitations laid the laminate sheet on flat surface in between 2 plywood sheets for minimum 48 Hrs.
